

# Grade GUARD™

**1-877-WONT ROT**

## *Grade Line Post Protection*

So, how do you help guarantee that your structure will serve as a landmark for years to come? How can you protect your wood post foundation from falling victim to decay? Two words. **Grade Guard.**

**Grade Guard** is a great way to protect the posts specifically in the area where decay gets its start. Typically, decay occurs at the grade line and up to 8" below grade. **Grade Guard** offers effective, affordable post protection that is a must for pole buildings, decks, pergolas, or any "post in the ground" project.
