

POST™ **protector**

1-877-WONT ROT US Patent

The Simple Solution To Inground Post Decay

So, how do you help guarantee that your structure will serve as a landmark for years to come? How can you guard against premature post decay resulting from moisture, micro organisms, insect infestation, concrete encasement, soil contact & inconsistent post quality? Two words. Post Protector.™

Post Protector.™ was first introduced in the pole building marketplace 10 years ago where it has had much success.

Post Protector.™ is now available as

the perfect complement to decks, pergolas, sunrooms or any other "post in the ground" projects!

Pole Building with Post Protector.™ 1998
